DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/2007 has been entered.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Joseph P. Mehrle (Reg. No. 45,535) on 9 October 2007.

This application has been amended as follows:

IN THE CLAIMS

Cancel claim 15 – 27.

Replace claims 8.

Claim 8:

A method for preserving content, comprising:

issuing, from a client, a content-bearing request to a service, wherein the content-bearing request originates from the client and is directed to the service;

receiving, at the client, a modified request and a redirection for authentication along with a directive to retain the content at the client, and wherein a resubmit application is also received on the client and is transparently installed on the client, and the resubmit application assists in redirecting to an authentication service and subsequent to the authentication automatically and transparently sends the modified request back to the service, wherein the modified request is done to permit the content to be recaptured after the non-authenticated client is authenticated;

authenticating the client with the authentication service; and

issuing from the client the modified request to the service, the modified request having the content so that the content does not have to again be re-supplied by a user associated with the client after successful authentication.

Allowable Subject Matter

Claims 1 – 8 and 10 – 14 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2131

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Art) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations, as recited in the independent claims 1 and 8.

The prior arts fail to teach or suggest a method for content-bearing request to a service wherein the content-bearing request originates from the client and is directed to the service; receiving, at the client, a modified request and a redirection for authentication along with a directive to retain the content at the client, and wherein a resubmit application is also received on the client and the resubmit application, transparently installed on the client, assists in redirecting to an authentication service and subsequent to the authentication automatically and transparently sends the modified request back to the service, wherein the modified request is done to permit the content to be recaptured after the non-authenticated client is authenticated; authenticating the client with the authentication service; and issuing from the client the modified request to the service, the modified request having the content so that the content does not have to again be re-supplied by a user associated with the client after successful authentication.
